I am a Full Stack Developer with more than 1 year of experience in the field. During this period of time, I learned and practised HTML, CSS, JavaScript, React, MongoDB and ExpressJS to craft websites with stunning design and complex functionality.

Skills

HTML | CSS | JavaScript | MongoDB | ExpressJS | React.js | Git | Basic UI/UX design

Work Experience

Artroom Design Studio - Web Developer
2022-2023

- Designed and developed a website according to client's needs
- Created a custom admin panel with authorization and authentication systems for client to manage content
- Implemented a database connection to store content in cloud

Projects

D2 Development - https://d2.up.railway.app/

This was my first project, after i finished my bootcamp. I tried to use all of the technologies i learned and created a website for a fictional web development agency. Front-End was done using HTML, CSS, JavaScript and it's libraries. For the Back-End i used MongoDB and ExpressJS

G-Setup - https://sarcasacras.github.io/g-setup/

I created this project as a template for my future e-commerce functionality websites. It was created using HTML, CSS, JavaScript and lacks a back-end, so the login and registration are not working.
